This version: 9 November 2026. The most recent version of this CV is always available at matskahl.github.io/cv.

Research Fields

Industrial Organization, Energy Economics, Public Economics, Empirical Microeconomics

Academic Positions

2025–present **Visiting Professor**, Department of Economics, Universidad Carlos III de Madrid

2025 **Visiting Researcher**, Universidad Carlos III de Madrid, March–April (host: Philipp Denter)

2019–2025 **Postdoctoral Researcher** (2025) and **Doctoral Researcher** (2019–2025), Institute of Economics, Leuphana University Lüneburg

Education

2025 **Ph.D. in Economics**, Leuphana University Lüneburg, *summa cum laude*
Dissertation: *Competition in the German Market for Gasoline Retailing*
Advisors: Thomas Wein, Boris Hirsch

2019 **M.A. in Public Economics, Law and Politics**, Leuphana University Lüneburg, with distinction
Exchange semester at the University of Lucerne, Switzerland, 2017

2016 **B.Sc. in Economics**, University of Mannheim

Job Market Papers

Public Entry, Announced: How State-Procured Infrastructure Affects Private Investment

In 2021, the German government announced where it would place about 1,000 subsidized fast-charging sites. This announcement came at least two years before the first of them opened. Would private investors retreat, race to pre-empt, or follow the public entrant? Combining the government's planning map with 29 archived versions of the federal charging register, I find that the announcement did not deter private investment. At motorway rest areas, a loss of more than 0.22 private charging points within 5 km can be ruled out. Once public sites opened, public capacity was largely additional, raising total local capacity by 0.74 points per public charging point (0.90 after adjusting for pre-opening trends). If some public sites would have been built privately anyway, true additionality would have been lower. A parsimonious model sheds light on the pattern: when the pace of building, rather than demand, limits private investment, public capacity is largely additional.

Cross-Border Competition and Tax Pass-Through: Evidence from Germany's 2022 Fuel Tax Cut

How does a national tax cut pass through at an international border on the treated side? How does it spill over to the untreated side? I study Germany's 2022 fuel-tax cut using station-level price data and exact driving distances to French competitors. German diesel stations within 10 km of a French gas station cut prices by 0.96 cents per liter (95% confidence

interval: 0.43–1.49) more than stations further than 50 km inland. That corresponds to a pass-through premium of about 6 percentage points (95% confidence interval: 2.6–8.9). The premium appears at the start of the cut, is largest within a few kilometers of the border, and disappears after the tax returns. French stations near the border also cut prices by a similar amount, but they were already falling relative to inland France before the cut. The premium arises where the tax cut closed the cross-border price gap, that is, for diesel, and it does not appear where the gap stayed wide, that is, for gasoline. A model with treated domestic and untreated foreign rivals shows that, at a given intensity of cross-border substitution, feedback through foreign prices cannot account for the premium on its own. The evidence is consistent with a change in that intensity: cross-border competition that becomes active when the price gap is small. The incidence of a national tax cut varies within a country with local competitive conditions.

Conference and Seminar Presentations

2026 Annual Congress of the European Economic Association (Dublin); Applied Reading Group, Universidad Carlos III de Madrid; Research Seminar, Universidad Autónoma de Madrid; Simposio de la Asociación Española de Economía (Las Palmas de Gran Canaria, accepted)

2024 EARIE Annual Conference (Amsterdam, accepted); 6th Workshop for Young Scientists on Applied Economics (Hannover)

2023 EARIE Annual Conference (Rome); 5th Workshop for Young Scientists on Applied Economics (Hannover); Doctoral Program Behavioral Economics and Societal Transformation (Lüneburg); Empirical Microeconomics PhD Workshop (Lüneburg)

2022 Empirical Microeconomics PhD Workshop (Lüneburg)

2021 Annual Meeting of the Verein für Socialpolitik; Empirical Microeconomics PhD Workshop (Lüneburg)

Honors and Scholarships

2025 Leuphana Dissertation Award, Leuphana University Lüneburg

2017–2024 e-fellows.net Scholarship

Teaching Experience

2025–present **Universidad Carlos III de Madrid**, Lecturer (in English)
Economics I (Microeconomics); Industrial Organization

2022–present **Verwaltungs- und Wirtschaftsakademie (VWA) and Berufsakademie (BA) Lüneburg**, Lecturer (in German)
Macroeconomics

2019–2025 **Leuphana University Lüneburg**
Graduate School, own courses (M.A., in English): Introduction to Economics for Non-Economists; Economics Preparatory Course
Professional School, junior lecturer (in English): Regulation Economics; Competition Economics
College, teaching assistant (B.Sc., in English and German): Macroeconomics 1 and 2; Microeconomics 2; Applied Macroeconomics: International Economics; Applied Microeconomics: Industrial Economics

2016–2018 **Leuphana University Lüneburg**, Tutor in Microeconomics (in English), Faculty of Economics and Center for the Study of Democracy

Refereeing

Annals of Regional Science; Economics Letters; Energy Economics; The Energy Journal; Finance Research Letters; Journal of Baltic Studies

University Service

2019–2025 **Leuphana University Lüneburg**
Program Coordinator, Economics Minor (incl. reaccreditation, 2023)
Deputy Program Coordinator, B.Sc. Economics (incl. conversion into an English-language program, 2022, and reaccreditation, 2023)
Member, Examination Board
Member, Study Commission Governance & Law (2019–2022)

	Member, Appointment Committees for the Professorships in Law and Economics (2023) and in Applied Economic Policy/Macroeconomics (2022)
2022–present	**Alumni- und Förderverein der Leuphana Universität Lüneburg e.V.** (alumni association), Board Member; Chair since 2024

Memberships

2024–present	European Economic Association
2021–present	Verein für Socialpolitik (German Economic Association)

Additional Training

2025	BSE Summer School, Barcelona School of Economics: "Dynamic and Non-linear Panel Data Models" (Badi Baltagi); "Digital Empirical Methods for Cartel and Corruption Screening in Procurement" (Kei Kawai and Juan José Ganuza)
2025	PhD course "Causal Inference and Applied Microeconometrics" (Nils Braakmann), Leuphana University Lüneburg
2024	BSE Summer School: "Difference-in-Differences with Panel Data" (Jeffrey M. Wooldridge)
2024	PhD course "Field Experiments" (Adriaan Soetevent), University of Vechta
2023	BSE Summer School: "Empirical Methods for the Analysis of the Energy Transition" (Mar Reguant)
2022	BSE Summer School: "Quantitative Methods for Public Policy Evaluation" (Albrecht Glitz); "Dynamic and Non-linear Panel Data Models" (Sergi Jiménez-Martín)
2021	ÊSTIMATE Summer School (Jeffrey M. Wooldridge), Michigan State University
2020	14th International Research Workshop, Helmut Schmidt University Hamburg, incl. "Spatial Data Analysis with Stata" (Timo Mitze)

Skills

Software	Stata, R, LaTeX, Python
Languages	German (native), English (fluent), Spanish (basic), French (beginner)
